From \$25

What is Threading

Threading is a hair removal technique that uses a cotton thread. The thread is twisted and rolled along the surface of the skin entwining the hairs in the thread, which are then lifted out from the follicle. It is an ancient Indian and Middle Eastern technique.

Benefits of Threading

- Eyebrows look more defined as it takes out the smallest hair from its follicle.
- Threading is hygienic and the most natural way of hair removal as a new hygienic thread is used every time.
- Threading is a chemical free practice unlike other methods or the use of other depilatories, irritation and skin rashes are avoided as the top layer of the dead skin is not stripped off in the process.
- No hair is too thin, too thick for threading.
- Regular threading visits will slow down the hair growth.
- Threading is beneficial to people with sensitive skin, or for those on Acne Medication such as Retin-A, Acutane, etc.
- Threading can be done in all parts of the face.
- Threading generally lasts up to 3-4 weeks New hair grows thinner and finer.
- Both men and women can use this technique
- Eyebrows Look defined, as it takes out the smallest hair from its follicle.
